APP

App

- **Perceiving accurately every change in the body.** Equipped with 4 high-precision G-sensors and 8 tactile sensors, with dual-frequency bioelectrical impedance analysis technology to obtain the truth of your body.
- **Smart and always improving.** Advanced hardware and algorithm supports 13 body metrics measurement and analysis, multi-user identification, and OTA update is available.
- **More than just good looking.** It comes with integrated design of the ITO-coated tempered glass panel and a large LCD screen inside. Get to know the key body metrics soon after stepping on the scale.
- **Keep everything in your hand.** Get 13 full body metrics measurement and analysis results and body's five-segment (left arm, right arm, torso, left leg, and right leg) fat and muscle analysis on the App. Keep knowing any change of body compositions from the graphic trend analysis.
- **Never lose any records.** All raw data automatically saves on the scale, until it connects to your mobile to sync with App.

PHYSICAL DETAILS

Dimensions: 300*300*27.5mm (Scale)
300*33*35mm (Handle bar)
Weight: N.W.: 2.03kg, G.W.: 2.53kg
Display: VA LCD 4.86"(107*62mm)
Power Supply: 300 mAh lithium battery (Type-C)
Connectivity: Bluetooth 5.0 BLE
Built-in Memroy: For 100 sets of results

Specifications

Weight Range:180kg/400lb/28st
Weight Division: 0.1kg/0.2lb
Weight Accuracy: ±0.3kg (5~60kg)
±0.4kg (60~120kg)
±0.5kg (120~180kg)
No. of Electordes: 8
Bioelectrial Frequiencies: 20kHz, 100kHz

Outputs

Outputs:

Weight, Body fat, Bone mass, Protein, Body water, Muscle, Skeletal muscle, BMI(Body Mass Index), Body fat rate, Obesity level, Visceral fat rate, BMR(Basal metabolic rate), Fat-free body weight, Subcutaneous fat, SMI(Skeletal Mass Index)

Segmental Outputs (Left/Right upper limb, Trunk, Left/Right lower limb):

Fat analysis, Muscle balance

Weight Control and Others:

Body type assessment, Weight control, Fat control, Muscle control

APP COMPATIBLE WITH

iOS 9.0 or later

Android 10 or later

ViHealth
Available on iOS/Android
